support,

What's New In Synexsys Inventory LITE?

Synexsys Inventory is a solution for monitoring and managing PC's and servers. With the Synexsys Inventory Server, you can start from zero, i.e. complete setup from an empty database. When you start the Synexsys Inventory Server, it will copy/backup the inventory database, which is a native database of Synexsys Inventory. By using the Synexsys

Inventory Server, you can start with installing on your PC's, and you can keep updating/upgrading all the time. This way you do not have to worry about losing data and need to reinstall the solution because of data lost or lost compatibility. The Synexsys Inventory Server is optimized for Windows Vista and higher OS's. Description: Synexsys Inventory is a solution for monitoring and managing PC's and servers. With the Synexsys Inventory Server, you can start from zero, i.e. complete setup from an empty database. When you start the Synexsys Inventory Server, it will copy/backup the inventory database, which is a native database of Synexsys Inventory. By using the Synexsys Inventory Server, you can start with installing on your PC's, and you can keep updating/upgrading all the time.
