
**Substance Painter Live Link For Cinema 4D 3DS Max Maya
Modo Blender And Houdini Win**

Hi guys, just to let you know
that the Substance Painter
Live link now also works
with Houdini Octane!!!!!!.

Next will be the
implementation of Octane in
Maya!...! I just wanted to let
you know that Substance

Painter Live and Octane now work! All you have to do is download the latest version and install it in your Maya folder, then go to the Substance Painter Live control panel and log in with the credentials you used to subscribe to Substance Painter! You will then be able to switch between Octane and Substance Painter Live editing modes! It couldn't be easier, and I certainly think it's cool and

fun!
